[^0]
[^0]:    If you must harvest this corn, subtract the harvesting costs; and if you can only use dry corn, subtract drying costs. Of course the prices
    and negotiations between you and the seller, but unless there are special circumstances it should not be above the prices shown here.
    and negotiations between you and the seller, but unless there are special circumstances it should not be above the prices shown here.
    ** National Corn Handbook NCH 61 "Calculating Grain Weight Shrinkage in Corn Due to Mechanical Drying" demonstrates two methods for calculating total shrink. The value found in 3c is the constant shrink factor Typical constant shrink factors range from 1.163 to $1.5 \%$ per point. You may allow the constant shrink factor to auto-calculate or directly enter the constant shrink factor used at a local elevator
    The constant shrink factor found in 3 b can not be less than the water shrink factor in 3 a .3 b is used to calculate the $\%$ shrink.
